

SITE ASSESSMENT

HAZARD & VULNERABILITY

A site assessment through AEGIX is performed by a certified professional assessor and is an essential component of any comprehensive multi-layered safety plan.

Our Assessment

- ✓ Identify vulnerabilities that may already exist in a current school building, surrounding property or other structures. If the building is in the design phase, we will make recommendations based on the submitted plans.
- ✓ Vulnerabilities may include how lighting is arranged, moving safely through the area, clearly designated borders, purposeful use and upkeep of the property, as they contribute to crime prevention and the fear of crime. All are examples of what a CPTED evaluation will assess.
- ✓ The assessor will also note present or missing security features and best practices such as a securing doors inside and out, cameras, alarms, emergency communication technologies etc...

CPTED Principles Basis for Assessment

- Natural Surveillance
- Access Control
- Territorial Reinforcement
- Maintenance
- Security

● Meet the Instructor!

Justin Chapman (Ret.Capt.) served 28 yrs. as a police officer, of which decades were spent working as, with or supervising SRO's. He has been instructing school and law enforcement personnel since 2007, while adjusting some subject matter in an effort to keep up with the changing times and best practices in safety, preparation and response. He has a passion for keeping innocent children and staff safe while empowering them to take action. He is nationally certified by IADLEST as well as a CPTED professional through NICP.
